LDI AUTOMATION

SONALI BRIGHTON TTM TORONTO

Background

Laser **D**irect **I**maging Automation

Nuvogo 80 HXL & Technosystem

[redacted]

Objectives

- ❑ Implement automation for core imaging process
- ❑ Reduce operator intervention
- ❑ Increase throughput
- ❑ Improve yield
- ❑ Reduce random open defects

Process

- ❑ **Coordinated system integration with KLA and Technosystem technicians**
- ❑ **Nuvogo 80 HXL Qualification**

[redacted]

- ❑ **Technosystem Qualification**

Validated automation across the following properties:

- Material type
- Core thickness
- Copper weight

[redacted]

[redacted]

Challenges

Cross-functional team coordination

[redacted]

Advantages

- ❑ Reduce machine idle time
- ❑ Consistent panel handling
- ❑ Standardized cleaning process
- ❑ Improved equipment utilization
- ❑ Potential to generate more revenue

Public portfolio version - proprietary process parameters, network details, and internal performance data redacted.
